| CELLS - for Virology - Bacteriology - Microbiology laboratories                       |                          |   |                  |                             |               |            |
|---|--------------------------|---|------------------|-----------------------------|---------------|------------|
| Cells   | Code                     | Designation   | Packaging        | Min. packaging for delivery | Delivery time | Price €    |
| MRC-5 : Diploid cells Human fetal lung  | <a href="#">84002</a>    | 30 millions of fresh cells in suspension                                      | Flask 30 ml      | 1                           | 7 days        | contact us |
|   | <a href="#">84003</a>    | 10 millions of fresh cells in suspension                                      | Flask 10 ml      | 1                           | 7 days        |            |
|   | <a href="#">84003c5</a>  | 10 millions of cryopreserved cells  | Cryotube 1 ml    | 5                           | 7 days        |            |
|   | <a href="#">84003c10</a> | 10 millions of cryopreserved cells  | Cryotube 1 ml    | 10                          | 7 days        |            |
| VERO : African monkey kidney cells  | <a href="#">84009</a>    | 90 millions of fresh cells in suspension                                      | Flask 30 ml      | 1                           | 7 days        | contact us |
|   | <a href="#">84005</a>    | 35 millions of fresh cells in suspension                                      | Flask10 ml       | 1                           | 7 days        |            |
| READY-TO-USE CULTURE MEDIUM - for Virology - Bacteriology - Microbiology laboratories |                          |   |                  |                             |               |            |
| Growth medium for MRC5 cells (10 % SVF)   | <a href="#">M0430C</a>   | Ready-to-use growth medium (MEM 1X - 10 % SVF - 2 mM L glu - Antibiotics)     | 10 Flasks 125 ml | 1                           | 7 days        | contact us |
| Maintenance medium for MRC5 cells (2 % SVF)   | <a href="#">M0431E</a>   | Ready-to-use maintenance medium (MEM 1X - 2 % SVF - 2 mM L glu - Antibiotics) | 10 Flasks 100 ml | 1                           | 7 days        |            |

|                   |   |
